## Our Inventory Management Methodology

Preliminary Data Acquisition

Expediting starts at Purchase Orders placement

Bar-Coding System

Cloud-based Software

Full Reporting Capabilities

Customized Dashboards & Tracking Tools

Logistics from start to finish

# PROCUREMENT

# SERVICES

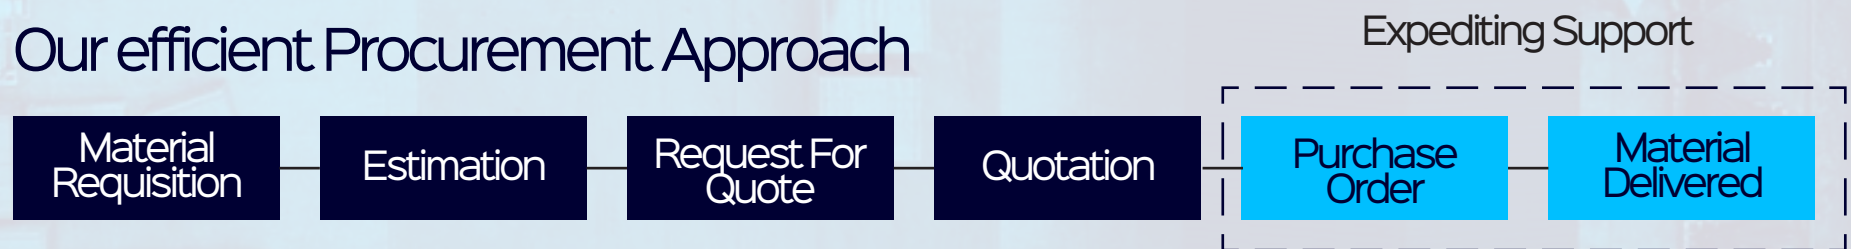

Our team of professionals can help customers evaluate total material required for the projects and provide feedback.

Utilizing customer data or new estimates obtained from manufacturers we can provide estimation services.

When the project is ready to move forward, quotations seeking and order placement is one of our many specialties.

As material comes from many parts of the world, we can provide expediting services to ensure that material will get to the project on a timely manner.

## Our efficient Procurement Approach

# Project Dashboard Capabilities

Allows for resource planning on project site and during logistic operations.

Our inventory platform is cloud based, and it can be accessed by the customer as well from any computer or smart device.

Percentage of completion for each of the project stages can be easily viewed.
